PROJECTS

Synapse 2026 | *Next.js, TypeScript, TailwindCSS, Supabase* | [Live Link](#)

- Spearheaded the development of the official full-stack registration platform for Synapse 2026, managing events, user profiles, and multi-tier team formations.
- Engineered a secure authentication system using Supabase Auth with custom PostgreSQL database triggers to seamlessly synchronize user metadata.
- Designed a custom payment verification pipeline using Supabase Storage, enabling users to securely upload transaction screenshots for manual coordinator review.
- Developed a role-based Admin Dashboard to streamline the approval workflow, automating live revenue tracking, profile updates, and confirmation email dispatches upon verification.

Physics-on-go | *Next.js, React, TypeScript, Node.js, MongoDB* | [Live Link](#)

- Developed a full-stack e-learning platform to deliver educational content with real-time performance tracking.
- Engineered advanced features including test modules with performance analytics and daily practice problems.
- Implemented secure RESTful APIs with Role-Based Access Control (RBAC) for distinct user types.
- Built a modular frontend with a custom component library and managed complex application state.

Excalidraw Clone | *TypeScript, React, Node.js, PostgreSQL, WebSockets* | [GitHub](#)

- Developed a real-time collaborative whiteboard application using a monorepo structure (Turborepo, pnpm).
- Implemented real-time drawing synchronization via WebSockets (ws) and an Express.js backend.
- Managed data persistence and user authentication using Prisma ORM and PostgreSQL.
- Built a dynamic React frontend with TypeScript for intuitive user interaction.
